

Photo Requirements

To produce photo quality engravings, photos must meet several requirements. Please avoid photos that are low resolution, blurry, or in low light, and **do not** crop or edit photos prior to sending them. (Please allow 6-8 weeks for delivery once photos and payment are received.)

1. File Size and clarity:

- ◆ Photos should be at least 1 to 2 MB, if not more, to ensure the resolution is high enough to capture details in the engraving. File size is not the only factor. Blurry photos produce blurry engravings. **Note:** When you zoom in, especially on the face, it needs to be clear, not blurry or pixelated.

Low Resolution

High Resolution

Photo Requirements

2. Light:

- ◆ It is difficult to get details from low light photos. Sunlight is generally best, if possible, but not a requirement.

Low Light

Good Light

(Zoomed in to show difference in light)

3. Cropping:

- ◆ Please do not crop photos to zoom in on your dog. We need space around the dog to include in the border. We will do any necessary cropping or adding.

Cropped, tail cut off, no room for border

Uncropped—room for border
